Inkjet Papers – Product Portfolio

CAD/Engineering	<p>DT Plot 8670 High-quality coated inkjet paper with matt finish for monochrome and coloured CAD/GIS/GEO prints, presentations, POS signage and trade fair graphics. This medium features high whiteness, excellent colour reproduction and line sharpness. Quick drying of dye and pigmented inks. Good black rub-off and wet smear resistance.</p>	95/120 g/m ²
	<p>Premium Plot 9670 High-quality coated inkjet paper with special haptics. Ideally suited for monochrome and coloured CAD/GIS/GEO prints, presentations, POS signage and trade fair graphics. The special finish features immediate encapsulation of pigmented black and enables maximum scratch-resistance. Good water resistance.</p>	100 g/m ²
Imaging Indoor	<p>Swiss Matt 9730 Multilayer-coated inkjet paper with matt finish for presentations, POS signage, trade fair graphics and poster prints. Its enhanced whiteness and smooth surface is ideal for high contrast, bright full colour prints. Quick drying of dye and pigmented inks. Immediate encapsulation of pigmented black. Good water resistance.</p>	90/100/120/ 140/180 g/m ²
	<p>Premium Swiss Matt 9710 Heavy-coated inkjet paper with matt finish for photography, poster prints and trade fair graphics. Extra-high whiteness and cool blueish shade. The exceptional colour gamut enables full-colour prints with excellent brightness and nuances, also in half and quarter tones. Best-in-class water resistance. Ideal for hot and cold lamination. In 120 g/m² and higher also suitable for solvent ink printing.</p>	90/100/120/ 140/180 g/m ²
	<p>Swiss Matt Adhesive 9720 Self-adhesive laminate with Premium Swiss Matt poster paper as top-liner and a detachable silicone paper on the reverse. Its permanent acrylate-based adhesive allows universal use for signage, trade fair graphics and CAD applications. Good resistance to light, heat and ageing. Ideal for hot and cold lamination.</p>	140 g/m ²
	<p>Photo Matt 8840 Heavy multi-layer coated premium poster paper with matt finish. Ideal for high contrast, high colour density prints in photorealistic quality. A special barrier coating allows wet-cockling free printing. Exceptional colour gamut with dye and pigmented inks. Quick drying with excellent wet-smear resistance. Ideal for hot and cold lamination.</p>	150/180 g/m ²
